

In order for SMT to be compliant to their certification for Occupational, Health and Safety all contractors will need to review and have access to SMT's Emergency Preparedness and Response procedures.

If there are any increased risks to the environment, health, or safety to SMT employees or other interested parties, with work that is being performed, please notify one of the contacts listed within the procedure so that extra precautions can be made.

Signing this statement is an acknowledgment that you have received and reviewed SMT's Emergency Preparedness and Response procedure and will notify an emergency contact if risks or potential hazards are identified.
